Cost Analysis Report - 2020.....	40
Cost Analysis Survey Responding Agencies	42

Introduction

The Texas Workforce Commission (TWC) is pleased to submit this report in compliance with legislative requirements. The Business Enterprises of Texas (BET) Customer Satisfaction Survey and Cost Analysis Report is submitted pursuant to TWC Rider 37 as part of TWC performance reporting for the BET program for the 2020–2021 biennium. Rider 37 reads as follows:

“The Texas Workforce Commission shall report by October 1 of each year of the biennium the following information to the Legislative Budget Board and to the Governor:

- a. The results of the survey and the Cost Analysis Report distributed to state host agencies on satisfaction of operational conditions such as pricing requirements, hours of operations, menu items, and product lines; and
- b. The total cost incurred by each state host agency for the operation of Business Enterprises of Texas cafeterias, snack bars, and convenience stores. Reported costs should include the value of the space used, maintenance costs, utility costs, janitorial costs, and the method of finance for each cost. An outline of the methodology that was used to determine the final estimate should also be included in the report.

The Customer Satisfaction Survey and Cost Analysis Report shall be prepared in a format specified by the Legislative Budget Board and by the Governor.”

The Survey of Customer Satisfaction was distributed to all state agencies in which BET operates a food service cafeteria, snack bar, or convenience store.

Since its inception in 2011 and until three years ago, the survey was conducted during the month of August. Last year the survey was conducted in May and, once again, an extended response period was needed to produce useful response numbers. This year the survey was conducted from August 3 to August 14 due to the COVID-19 pandemic. This adjustment resulted in 25 of the 46 Agencies responding and 1881 customer responses. The response is down considerably from last year as expected due to the significant increase in the number of State agency staff working remotely as a result of the COVID-19 pandemic.

The survey process and how the survey and report are designed have been improved over the years. Improvements and adjustments for this year include:

- Additional and repeated contacts with buildings hosting BET facilities to better promote the availability of the survey.
- Introduction of new questions to the survey to survey the effects of the COVID 19 pandemic on facility sales as well as maintaining several of the same questions to enable trend analysis.
- Including prior year survey results in the report for questions that remain the same from year to year.
- Added the “Positivity Rate” which measures the number of positive results compared to the previous year.
- Adjusted survey response period to August 3 thru August 14.

Actions Taken as a Result of the 2019 Customer Satisfaction Survey

BET distributed survey results to licensed managers who operate facilities. BET discussed customer feedback and managers were asked to make improvements where possible.

Managers were made aware of compliments and best practices identified by customers.

Complaints and compliments were reviewed with the managers so that areas for improvement or Commendation could be recognized. The results of the survey were used as an educational topic during a general Session at the October 2019 annual BET Training Conference.

Summary of the 2020 Customer Satisfaction Survey Results

Although many of the categories surveyed remained stable within one to two percentage points from 2019 to 2020, BET survey respondents once again reported that they saw improvement in BET operations in the areas of overall value and product selection.

Survey responses showed that there are still areas for improvement, including the expansion of healthy offerings. BET offers training to staff and licensed managers in areas that need improvement.

Respondents showed a slight increase in their satisfaction with the product pricing in our facilities.

Many respondents provided preferences and opinions consistent with those received in past surveys:

- Respondents once again listed healthy offerings such soups, salad, sandwiches and chicken as their most frequently desired menu options. However, the largest percentage of customers 42.19% responded that they normally purchase a meal consisting of meat and vegetables in BET facilities.
- Customers responded, as they have in the past, that they valued convenience, location and price above all when deciding to shop in BET facilities.
- Customers once again responded that the biggest competitor of the BET facility is the customer non-retail food sources. This is due most often to customers choosing to bring food from home.

The 2020 survey included several new questions designed determine the impact COVID-19 had on customer perceptions. This information will assist BET to evaluate necessary modifications to increase customer comfort levels with using BET facilities in the wake of the pandemic. It will also inform consideration of new food service models.

Following are a few of the primary observations based on survey responses:

- Over 85-percent of all respondents use the services BET managers offer in their workplace with over 97 percent stating they spend \$10.00 or more. However, BET staff also learned that there are opportunities to increase the frequency of customer weekly visits as many respondents reported that they seldom shop in BET facilities.
- Quality of food was rated almost 9 percent higher this year compared to last year.
- Respondents made clear that they prefer shopping at BET food service facilities over vending machines. Respondents also indicated that, when they make purchases from vending machines, it is most often nuts.
- Over 48 percent of all respondents would not be comfortable dining in BET food service facility dining areas due to the pandemic, primarily due to the concern about crowds indoors, but also indicated the measures that would alleviate those concerns.
- Over 62 percent of all respondents noted they would be more likely to bring cooked food from home in the wake of the COVID-19 pandemic.

2020 Customer Satisfaction Survey Results

The following tables and graphs reflect the 1881 responses to the topics addressed in the survey. For questions remaining consistent from 2019 to 2020, the graphs also reflect 2019 survey results. The graph directly and the table on the next page demonstrate the rate of positive comments compared to the previous year for questions consistent from 2019 to 2020

Positivity Rate 2020 Compared to 2019			
Question #	2020	2019	+/-
3	81.32%	75.54%	5.78%
